## Re-Conditioned Prepayment Meters

### Ferranti Type

Thank you for purchasing a Westwood Ferranti Coin Action.

To change the old coin action for a new one:

1. Remove the meters cash box.
2. Unscrew the knurled nut and push lever backwards.
3. Pull the coin action to the right to remove it from the meter.
4. Simply reverse these instructions to insert the new coin action.

The Ferranti meter has a variable tariff, and if you have purchased a £1.00 coin action you will need to change the units of electricity given per coin.

To settings are changed as follows:

1. Break the yellow seal on the hinged window and open window.
2. If you have an armed cash box you will need to remove the cash box instead.
3. Gently pull the pointer up and outwards then slide it to the desired settings and press gently back into the mechanism.
4. **Do not press the black plunger** in the top left hand corner as this will make the mechanism run backwards and trips lose the meters settings.
5. Close the window and reseal with a yellow meter seal or replace armed cash box
